** Not Shown Above*

All standard Mobile Express® ice bins are constructed with stainless-steel exteriors and polyethylene or stainless-steel liners. Tops include a condensate drip pan (for RL model flakers only) and patented factory mounted ice level control boxes. The ice level controls are integrated into the ice bin top to ensure proper alignment, provide greater protection, and external access to photo eyes. Stainless-steel lined bins have an optional fully seam welded coved corner option for food grade applications.

¹Virtually any brand and model ice maker. Contact Howe for availability and pricing.

Howe Mobile Express® Carts

Our model CP1500 & CP2500 ice storage bin systems are available with the bump style door shown below. This design eliminates the inside baffle assembly to give full access through the door opening for easy ice access and easier cleaning of the bin interior.

- Insulated polyethylene cart tops are hinged to fold down out of the way when in use. By remaining hinged to the cart, potential for cross contamination and loss of top is reduced.
- The standard polyethylene cart color is charcoal brown
- Carts are also available in light gray for food processing applications.
- The optional SA33 ice tote kit for the polyethylene ice carts consists of six totes per cart.
- Special hinges are available to allow for removal of the top for cleaning and sanitizing.

Polyethylene Carts

*Optional SA33 tote kit
(available for CP200 carts only)*

ME200 mobile cart

CP200 mobile cart

Howe Mobile Express® Carts		
	ME200	CP200

Howe's ongoing commitment continues by providing the best equipment for food cooling applications throughout the food industry.

Howe ice storage bins have been designed and specially built for food service application. From our smallest model CP1000, through our larger model CP4500 each bin has been designed with sanitation and safety in mind.

Stainless steel liner with covered corners

Food processing and distribution facilities can rely on Howe Mobile Express ice storage bins to meet or exceed their sanitation requirements. Howe bins feature seamless covered corners for easy cleaning and sanitizing of the ice storage bins. As part of our food application package mobile carts are now available in light gray.
